inside District 5
December 6, 2018, 7:35 AM

Question 1
• Other/see comments

Question 2
I definitely support efforts to reduce litter and waste going to the landfill, and I hope composting efforts can be more widespread and we can reduce the amount of trash our city sends to the landfills. Please also keep in mind the needs of the food vendors. I hope this can be done without burdening anyone with big expenses.

Name not available
December 6, 2018, 7:51 AM

Question 1
• Yes

Question 2
I think we should do all we can to advance awareness around reducing waste and banning single-use plastics. Fully in support of all steps in that direction. Thank you!

Rod Richardson
inside District 1
December 6, 2018, 8:05 AM

Question 1
• Other/see comments

Question 2
Please turn your attention to crime and homelessness in Berkeley rather than something of this nature. Leading is about helping our neighborhoods improve.

Question 1
Berkeley City Council, 12/11/18: Single Use Disposable Foodware
Should the City Council adopt a first reading of the Single Use Foodware and Litter Reduction Ordinance?

• Yes

Question 2
Wonderful idea. We need to reduce waste.

Zach Cowan
inside District 6
December 6, 2018, 8:11 AM

Question 1
• Other/see comments

Question 2
This seems like a good idea, and should be expanded over time to include other parts of the economy, like retail packaging, requiring that certain products be offered in bulk, etc. However, it won’t be free. • The “Financial Implications” part of the item says: “Staff time will be required to launch programs related to the Single Use Foodware and Litter Reduction Ordinance. Some programs and services may be provided by community partners at relatively low cost. Once launched, staff time for administration and enforcement of the Ordinance will be limited. Costs, sources of funding and community partnerships to be determined by the City Manager.” • One wishes it were so. Staff time may be “limited” (isn’t everything?) but it will not be insignificant; it will have to come from other programs. To the extent this program is contracted out to “community partners” the cost will only grow over time and come to be regarded by those partners as an entitlement. The best part is this: “Costs, sources of funding and community partnerships to be determined by the City Manager.” As a nod in the direction of the fact that Berkeley operates under the Council-Manager form of government, that is appropriate enough. But in context, it’s just passing the buck. • Again, this seems like a fine idea, which probably should be replicated nationwide, and it is probably well worth the price. But it won’t be free (or cheap) and no one should pretend it will be. It could, of course, be supported by a regulatory fee on affected businesses. Perhaps this is not desirable or politically palatable, but it should at least have been mentioned as an option that was considered and rejected.

Question 2
Enough with the social engineering. Instead, please take on the garbage piled up at homeless encampments in West Berkeley.

Name not shown
inside District 3
December 6, 2018, 11:39 AM

Question 1
- No

Question 2
I support the move to sustainable foodware. But I don’t think that the concept of sustainable foodware is terribly complex such that it requires a training program. It would be sufficient to give examples of compliant foodware and examples of vendors of compliant foodware and examples of food providers that have already made the switch. There is sufficient time (2020) for food providers to figure out how to make the switch without “training” from the City of Berkeley. If anything, the City of Berkeley should offer vendors of compliant foodware special mention if the vendors develop the training necessary for customers to begin to use their products. The focus of the City should not be on food service, but rather on street maintenance and other existing city responsibilities.

Question 2
Clear out the encampments and fix the streets. Quit coming up with stupid ways to spend more money.

Name not shown
inside District 5
December 6, 2018, 12:08 PM

Question 1
• No

Question 2
Re-usable for "eat in" makes sense. Re-usable for "take-out" is never ever ever ever going to work in practice. The end result will just be wasted resources, energy, and cost of "re-usable" foodware being thrown out. Even if every resident of Berkeley underwent rigorous training, we’d have how many non-residents of Berkeley throwing how much stuff out? Don’t make the perfect (zero waste in theory, huge waste in practice) the enemy of the good (less waste and compostable/natural items for what we do use as single-use).

Name not available
December 6, 2018, 12:12 PM

Question 1
• No

Question 2
What do you imagine the environmental impact of the unnecessary wear and tear on vehicles caused by the abhorrent condition of our streets? How about the volume of trash that is accumulating in every homeless encampment in town, and it finding its way into the storm sewer system and being blown out into the bay? Enough with the narcissistic virtue signaling. Get on to running the city’s most basic services efficiently!!!

Should the City Council adopt a first reading of the Single Use Foodware and Litter Reduction Ordinance?

inside District 1
December 6, 2018, 12:28 PM

Question 1
• No

Question 2
I fail to see how this is a grave problem in need of immediate regulation, or how adding more FTEs will fix it. For people who can afford to eat out all the time, add a tax that would pay for the disposal of this foodware, or for the cost of the greener kind (but note that restaurants have incredibly small margins, and rely on many customers who are very price-sensitive). Many homeowners are not rich enough to eat out, so why make them pay for these FTEs? What is the message we are sending them? If you want to raise more money, tax people who are able to spend and consume.

Berkeley City Council, 12/11/18: Single Use Disposable Foodware
Should the City Council adopt a first reading of the Single Use Foodware and Litter Reduction Ordinance?

- Yes

Question 2
There should be a city tax on single-use food utensils.

Jake T
inside District 1
December 6, 2018, 6:32 PM

Question 1
- Yes

Question 2
I do support this. I daily pick up 4-5 single serve plastic items in front of my house, and see countless littered plastic items on the way to BART every day. As a society, this plastic is such a curse - instant gratification with very little added cost, but huge downstream consequences. Our streets are filthy, oceans trashed (we live on a BAY!), and plastic particles are even in our drinking water. Most single serve plastic serves a useful life of several seconds (a stir stick) to 20 minutes (a coffee lid). Why should we create waste that has so little long term value. I know that it is a challenging environment for a food business, but the plastic is killing our world and is not sustainable at any level. This is not the world I Want to raise my kids in. Consumers and businesses should be responsible, but we are not - which is why measures like this are necessary. Additionally, I would like to see REDUCTION be the first priority, such as a law requiring all customers be asked if they would like any additional piece of non-edible trash with their food (lid, straw, napkin, bag, sauce container, etc). Lastly, PLA corn plastics are not good for the environment. They are rarely composted (it isn’t easy) and land is destroyed in order to grow corn to create single serve items - used once! We must do better than this!

December 7, 2018, 9:15 AM

Question 1
• Yes

Question 2
This is a good first step to addressing the global plastic pollution we are facing. The EU recently voted with a huge majority to ban single-use disposables; unfortunately, we can not expect such leadership on a Federal level, and so this is another opportunity for Berkeley to lead the way. The stakeholder process has been inclusive, and as time goes by, we can modify and expand this kind of legislation. Thank you.

Question 1
• No

Question 2
I don't think we should be treating compostable paper containers the same as plastic ones. Is it really better environmentally to wash durable dishes rather than compost paper ones? I think the emphasis should be on supplying truly compostable containers and making sure they are composted.
Berkeley City Council, 12/11/18: Single Use Disposable Foodware
Should the City Council adopt a first reading of the Single Use Foodware and Litter Reduction Ordinance?

**Question 1**
- Yes

**Question 2**
I would go even further - that all stir sticks and straws must be compostable, as well. And then move to no longer selling plastic and styrofoam containers in our grocery and party goods stores; compostables are readily available.

Question 2
It's a start, if the CC didn't spend months agonizing and debating this but just did it. We all have to do whatever we can, and as usual, Berkeley can lead the way, and btw, speaking of Peet's, do you know their coffee bags aren't compostible? I asked, and they said they're working on it. Well, come on already!
